What's ahead for food—Even without shortages, economists expect that food prices will climb steeply in 1975. We digest forecasts of future problems and suggest ways to eat well in spite of the increases.

¶ High-yield stocks to grow on—Prices are so low these days that some stocks are producing bondlike yields. We analyze their potential for stocklike growth.

¶ The return on a tax preparer—Whether a tax man can save you more than his fee depends on an accurate assessment of the intricacies of your return—and his ability.
